Arms Trade and Economic Development Jurgen Brauer, Paul Dunne, 2004-08-02 Countries that spend scarce resources to import arms from abroad often require arms sellers to 'reinvest' part or all of the proceeds back into the arms-importing country. These so-called 'arms trade offsets' are therefore thought to enhance domestic economic development. But does this process actually succeed? This book examines the theory and policy applications of arms trade offsets and looks at more than a dozen case studies drawn from across Europe, Africa, Asia, and the Americas. The chapters, based on original research and published here for the first time, are all written by leading experts. That an impressive, lucid and cohesive volume such as this will interest defence economists can be taken almost for granted. The book will also be a useful and enlightening read for those interested in international development economics, military studies and policy-makers across the globe.

The Arms Trade, Security and Conflict Paul Levine, Ron Smith, 2003-05-15 The Arms Industry is an area that is of huge concern to many people around the world. The economics of this hugely important industry are a vital strand that needs to be understood. This volume brings together contributors from all over the globe, such as Todd Sandler and Keith Hartley, and focuses on the important issues surrounding the Arms Trade.

Arming the South J. Brauer, P. Dunne, 2002-05-10 After marked reductions in military spending in the 1990s military budgets around the world are on the increase. In this book, renowned authorities re-examine the economics of military expenditure, arms production and arms trade in developing nations. It includes analysis of military spending in Africa, Asia and Latin America and new forms of civil conflict as well as nine case studies (Saudi Arabia, South Africa, Mozambique, Angola, Sub-Saharan Africa, Greece, Turkey, Guatemala and Chile). The book will serve as a valuable contribution to the fields of both development economics and security studies.

Defence Offsets and the Global Arms Trade Jonata Anicetti, 2024 This book offers the first comprehensive study of defence offsets and its economic, security, political and theoretical implications. Originating in the second half of the 19th
century, defence offsets - additional economic, industrial and technological benefits to states from buying foreign weapons - have since been a key feature of the global arms trade and defence industry. And yet, offsets are an under-researched and under-theorised phenomenon. This book fills this gap in the literature by offering the first general theory of defence offsets, as well as the first systematic analysis of the offset phenomenon. By building on the insights of scholars of defence economics and drawing from the International Relations liberal paradigm, as well as reviving and adapting Robert Putnam's two-level game framework, the book proposes a liberal-rationalist theory of defence offsets. It then proves the worth of such a theory through Qualitative Comparative Analysis (QCA) of fifty-four fighter aircraft transfers from 1992 to 2021 inclusive, and three in-depth case studies addressing offsets negotiated and agreed to as part of fighter aircraft competitions in Brazil, India, and South Korea. This book will be of interest to students of defence studies, defence economics, security studies and International Relations--

*From Defense to Development?* Sean M. DiGiovanna, Ann Markusen, 2003-09-11 This impressive book tracks the progress of twelve countries on five continents in moving resources from defense to civilian activity in the 1990's. Based on intensive field research, thanks to its truly international array of contributors, the book addresses each country with an impressive standard of scholarship. This accessible book is written i

*Arms Trade and Economic Development* Jurgen Brauer, Paul Dunne, 2004-08-02 With the US invasion of Iraq, the issue of arms trading is once again at the forefront of world events. Arms-importing countries often ask their suppliers to 'offset' the cost by reinvesting some of the money in their country.

*Disarmament, Peace and Development* Reiner Braun, Colin Archer, Ingeborg Breines, Manas Chatterji, Amelia
This new volume provides reflections and insights from leading public figures and activists who oppose military expenditure in any form. Many of the contributions to this volume were presented as speeches at the 'Disarm! For a Climate of Peace' meeting held in Berlin in 2016, organized by the International Peace Bureau.

The Oxford Handbook of the Economics of Peace and Conflict Michelle R. Garfinkel, Stergios Skaperdas, 2012-04-20 This Handbook brings together contributions from leading scholars who take an economic perspective to study peace and conflict. Some chapters are largely empirical, exploring the correlates and quantifying the costs of conflict. Others are more theoretical, examining the mechanisms that lead to war or are more conducive to peace.

Handbook of Defense Economics Todd Sandler, Keith Hartley, 2007-04-12 The second volume of the Handbook of Defense Economics addresses defense needs, practices, threats, and policies in the modern era of globalization. This new era concerns the enhanced cross-border flows of all kinds (e.g., capital and labor flows, revolutionary rhetoric, guerrillas, and terrorists) including the spillovers of benefits and costs associated with public goods and transnational externalities (i.e., uncompensated interdependencies affecting two or more nations). These ever-increasing flows mean that military armaments and armies are less able to keep out security threats. Thus, novel defense and security barriers are needed to protect borders that are porous to terrorists, pollutants, political upheavals, and conflicts. Even increased trade and financial flows imply novel security challenges and defenses. Globalization also underscores the importance of a new set of institutions (e.g., the European Union and global governance networks) and agents (e.g., nongovernmental organizations and partnerships). This volume addresses the security challenges in this age of globalization, where conflicts involve novel tactics, new technologies, asymmetric warfare, different venues, and frightening weapons. Volume 2 contains topics not covered in volume 1 – i.e., civil wars, peacekeeping, economic sanctions, the econometrics of arms races, conversion, peace economics, and the interface of trade, peace, and democracy. Volume 2 also revisits topics from volume 1, where there has been a significant advancement of knowledge – i.e., conflict analysis, terrorism, arms races, arms trade, military manpower, and arms industries. All of the main securities concerns of today are analyzed. Chapters are written by the leading contributors in the topic areas. *Up-to-date surveys on the pressing defense issues: theoretical, empirical and policy issues. *Coverage of theoretical and empirical studies of terrorism. *Contributions by the leading researchers in the field of defense economics.

The Economics of the Global Defence Industry Keith Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to our knowledge of the world’s major defence industries. Experts from a wide range of different countries – from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea – describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation’s defence spending, its spending on defence R&D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the
end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of ‘structure’ includes discussions of entry conditions, domestic monopoly/oligopoly structures and opportunities for competition. The section on ‘conduct’ analyses price/non-price competition, including private and state funded R&D, and ‘performance’ incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation’s defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years’ time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

**The Economics of Offsets** Stephen Martin, 1996 Ed: University of York, UK, Collection of new essays on various countries' offset policies.

**Public Sector Performance, Corruption and State Capture in a Globalized World** Susan Rose-Ackerman, 2024-06-14 This collection examines the difficult task of reforming governments worldwide to meet citizens’ needs and aspirations. It advances constructive efforts to enhance public accountability while recognizing the complex ways in which corruption, greed, and state capture undermine the legitimacy and performance of government. The contributors are political scientists, lawyers, and economists who bring a cross-disciplinary approach to their chosen subjects. The first group of chapters deals with public sector performance, development, and public participation. Complementary pieces by a practitioner and a scholar confront the challenges of achieving reform in countries with difficult political environments and extensive poverty and inequality. The second group emphasizes the way corruption and state capture limit the accountability and effectiveness of governments in both developing and wealthy countries. The contributions consider the institutional roots of dysfunctional government and their links to the private sector. Taken together, the volume surveys a wide range of topics with theoretical arguments and empirical findings that provide insights into real-world problems and policymaking dilemmas. Inspired by Susan Rose-Ackerman’s fifty-year exploration of public policymaking, public law, and corruption, the collection will be an invaluable resource for researchers, academics and policy makers working in the areas of Public Law, Anticorruption, and Political-Economy.

**The Economics of Defence Policy** Keith Hartley, 2012-07-26 Defence policy is of continuing interest and concern to all nations. There are armed conflicts and new threats. Difficult choices cannot be avoided. This book has three aims. First, to identify the typical questions raised by economists when studying defence policy. Second, to show how simple economic analysis can be used to answer these questions and contribute to our understanding of defence issues. Third, to provide a critical evaluation of defence policy.

**Managing Security** Laura R. Cleary, Roger Darby, 2021-11-28 This textbook is designed to be used by those tackling the
complex and challenging issues of security sector reform (SSR). The questions of ‘What is security?’ and ‘How can governments deliver it in the most efficient and effective manner?’ are central to this volume. The text explores the ways in which security might be achieved, providing readers with the guiding principles of governance and management. Principles are illustrated through reference to the experiences of countries engaged in reform of their security institutions, allowing the reader to identify continuities and discontinuities in the process of change within the security sector. Written by practitioners for practitioners, the book provides readers with a framework with which to assess and respond to first-, second- and third-generation issues within SSR. All chapters include an introduction to the topic, empirical case studies, and exercises to encourage readers to reflect upon their own experiences of governing and managing security. This book will be of much interest to students of security studies, defence management and defence policy, as well as to practitioners in the field of security management.

Non-Proliferation Export Controls Daniel Joyner, 2017-03-02 This volume provides a comprehensive and interdisciplinary examination of the Multilateral Non-Proliferation Export Control system and the national and international context within which it functions. Key features:

Technology Offsets in International Defence Procurement Kogila Balakrishnan, 2018-08-14 Technology offsets, a nonconventional international trade-financing tool, is used by governments (buyers) to obtain industrial and technological benefits from companies (sellers) as part of international procurement. Offsets deals involve billions of dollars and this practice exists in around 80 countries around the world. Though offsets is a popular practice in defence, it is increasingly gaining popularity in civil sectors. Offsets is often tainted by controversy and receives bad press. What then makes offsets popular? Governments claim that offsets delivers technology and knowledge transfer, skills in high technology sectors and employment, and offsets expands export opportunities through participation in OEM supply chains. For companies, offsets is mainly employed as a tool to obtain a competitive edge and win sales in international business. In the past, there have been mixed results of case studies on the impact of offsets successes and failures. Considering the mismanagement of globalisation, unfair trade agreements and current political and economic discontent, there is a stronger need for governments and companies to use vehicles such as offsets to create a relationship of trust and commitment for sustainable development. This book fills the gap in offsets and focuses on how to manage offsets more effectively by addressing issues of strategy, policy and implementation, technology management, governance and risk. Technology Offsets in International Defence Procurement is designed for those studying international procurement, international trade, international business, technology management, defence policy and industrial policy. This book will also be of interest to practitioners and policy makers in both government and industry.

The Economics of UN Peacekeeping Nadège Sheehan, 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism, multilateralism, human rights, and humanitarian ideas. UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces (e.g. humanitarian aid, election supervision, disarmament, mine clearance, civilian protection, and peacebuilding). The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process. Although UN peacekeeping has shortcomings, it must be considered essential for organizing and defending the world politico-economic order. UN peacekeeping is a political activity, but its production strongly depends on nations’ economic considerations. Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission. With low means and inadequate strategies to meet the challenges, UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner’s dilemma in contributions that delay deployments and create significant financial problems. Understanding how peacekeeping can be most cost-effectively carried out, while considering the importance of legitimacy in interventions, is essential. This book believes that regional organizations can ease the UN’s financial responsibility by managing conflicts in their regions. But, to be most effective, they must involve the UN in their interventions. This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness. It strongly recommends that NATO be empowered by the UN with the role of global peace police, and proposes the establishment of a UN high-ranking team of international specialists in peacekeeping issues. This research should be of interest to students and researchers looking at international and political economics, as well as international relations, defence, security and peace studies.

The Top Books of the Year Arms Trade And Economic Development Theory Policy And Cases In Arms Trade Offsets Routledge Studies In Defence And Peace Economics The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have captivated audiences this year. Arms Trade And Economic Development Theory Policy And Cases In Arms Trade Offsets Routledge Studies In Defence And Peace Economics : Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic
abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best: Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Discover the Magic: Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes.

As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
